Subject: CH2M Commitment to Community

Dear Ms. Garcia and Mr. Smith,

CH2M HILL Engineers, Inc. is committed to developing and implementing a program for the performance and promotion of public benefit activities during the term of the Agreement. This includes an annual \$25,000 contribution to the NMB Public Library as well as other important community activities.

Through our public outreach, we will initiate, organize and promote activities and measures towards resiliency of NMB facilities. We will also support public education and information initiatives including conservation and reduced consumption of water and energy.

Through our technical work on the Program, we will develop and implement policies, practices and programs to promote conservation of resources and the application of alternative sources of energy, including use of alternative fuel vehicles and solar power at NMB facilities, when appropriate. We will also recommend measures to adapt to sea level rise and propose other measures that protect NMB Water's assets.

Regards,
CH2M HILL Engineers, Inc.

Cc: Jose Smith, City Attorney
Pamela Latimore, City Clerk
